INDEX TO AUTHORS

A

ALLEN, HOWARD J., AULT, CHARLES, WINZLER, RICHARD J., and DANIELLI, JAMES F. Chemical characterization of the isolated cell surface of *Amoeba*, 26

AMOS, HAROLD. See BASEMAN, PAOLINI, and AMOS, 54

ANDERSON, RICHARD G. W. Isolation of ciliated or unciliated basal bodies from the rabbit oviduct, 393

ANDRÉ, JEAN. See CURGY, LEDOIGT, STEVENS, and ANDRÉ, 628

ASSIMACOPOULOS, ANDRÉ. See KAPANCI, ASSIMACOPOULOS, IRLE, ZWAHLEN, and GABBIANI, 375

AULT, CHARLES. See ALLEN, AULT, WINZLER, and DANIELLI, 26

B

BASEMAN, JOEL B., PAOLINI, DOMENIC, JR., and AMOS, HAROLD. Stimulation by insulin of RNA synthesis in chick fibroblasts, 54

BECKER, WAYNE M. See TRELEASE, BECKER, and BURKE, 483

BELMAN, SIDNEY. See ZUCKER, TROLL, and BELMAN, 325

BENNETT, GARY, LEBLOND, C. P., and HADDAD, ANTONIO. Migration of glycoprotein from the Golgi apparatus to the surface of various cell types as shown by radioautography after labeled fucose injection into rats, 258

BERGERON, J. J. M. See FARQUHAR, BERGERON, and PALADE, 8

BEVERS, MARINUS M. See VAN RIJN, BEVERS, VAN WIJK, and WICKS, 181

BLUEMINK, JOHN G. See DE LAAT and BLUEMINK, 529

BOSMANN, H. BRUCE. See GERSTEN, KIMMERER, and BOSMANN, 764

BROEKMAN, M. JOHAN, WESTMORELAND, NELSON P., and COHEN, PHIN. An improved method for isolating alpha granules and mitochondria from human platelets, 507

BRUYNEEL, ERIK A. See DEMAN, BRUYNEEL, and MAREEL, 641

BURKE, JOHN J. See TRELEASE, BECKER, and BURKE, 483

BURNS, R. C. See STASNY, BURNS, KORANT, and HARDY, 311

BUTCHER, FRED R., and GOLDMAN, ROSE H. Effect of cytochalasin B and colchicine on α-amylase release from rat parotid tissue slices. Dependence of the effect on $N^6,O^{2'}$-dibutyryl adenosine 3′,5′-cyclic monophosphate concentration, 519

C

CARSON, FREIDA L. See MARTIN, CARSON, and RACE, 775

CHAPLIN, DAVID D. See FEAGLER, TILLACK, CHAPLIN, and MAJERUS, 541

CLARK, WALLIS H., JR. See DEWEL and CLARK, 78

COHEN, PHIN. See BROEKMAN, WESTMORELAND, and COHEN, 507

COPE, G. H., and WILLIAMS, M. A. Improved preservation of parotid tissue for electron microscopy. A method permitting the collection of valid stereological data, 292

COTRAN, RAMZI S. See GIMBRONE, COTRAN, and FOLKMAN, 673

CRONSHAW, JAMES. See GILDER and CRONSHAW, 221

CURGY, JEAN-JACQUES, LEDOIGT, GÉRARD, STEVENS, BARBARA J., and ANDRÉ, JEAN. Mitochondrial and cytoplasmic ribosomes from *Tetrahymena pyriformis*. Correlative analysis by gel electrophoresis and electron microscopy, 628

D

DANIELLI, JAMES F. See ALLEN, AULT, WINZLER, and DANIELLI, 26

DEAN, PHILLIP N., and JETT, JAMES H. Mathematical analysis of DNA distributions derived from flow microfluorometry, 523

DEHEER, DAVID H., OLSON, MERLE S., and PINCKARD, R. NEAL. Characterization of rat liver subcellular membranes. Demonstration of membrane-specific autoantigens, 460

DE LAAT, SIEGFRIED W., and BLUEMINK, JOHN G. New membrane formation during cytokinesis in normal and cytochalasin B-treated eggs of *Xenopus laevis*. II. Electrophysiological observations, 529

DE LA TORRE, C. See GIMÉNEZ-MARTÍN, DE LA TORRE, FERNÁNDEZ-GÓMEZ, and GONZÁLEZ-FERNÁNDEZ, 502

DEMAN, JORIS J., BRUYNEEL, ERIK A., and MAREEL, MARC M. A study on the mechanism of intercellular adhesion. Effects of neuraminidase, calcium, and trypsin on the aggregation of suspended HeLa cells, 641

DEWEL, WILLIAM C., and CLARK, WALLIS H., JR. A fine structural investigation of surface specializations and the cortical reaction in eggs of the cnidarian *Bunodosoma cavernata*, 78

E

EISENBERG, BRENDA R., KUDA, AILEEN M., and PETER, JAMES B. Stereological analysis of mammalian skeletal muscle. I. Soleus muscle of the adult guinea pig, 732

ERICKSON, HAROLD P. Microtubule surface lattice and subunit structure and observations on reassembly, 153
EVERHART, LEIGHTON P., JR., and RUBIN, ROBERT W. Cyclic changes in the cell surface. I. Change in thymidine transport and its inhibition by cytochalasin B in Chinese hamster ovary cells, 434
— and —. II. The effect of cytochalasin B on the surface morphology of synchronized Chinese hamster ovary cells, 442

F

FABER, M. See MOORE, LINTERN-MOORE, PETERS, and FABER, 416
FAHIMI, H. DARIUSH. See HERZOG and FAHIMI, 303

INDEX TO SUBJECTS

A

Adenosine 3′,5′-monophosphate, cyclic, inhibition of cell growth of human fibroblasts in G_1 phase, biochemical study, 249
- -monophosphate, dibutyryl cyclic, regulation of phosphoenolpyruvate carboxykinase and tyrosine transaminase in hepatoma cell cultures, biochemical study, 181
- -monophosphate, dibutyryl cyclic, role in cytochalasin B and colchicine stimulation of α-amylase release from rat parotid tissue, biochemical study, 519
- transport, rabbit lung macrophages, showdomycin inhibition of serum stimulation, biochemical and light microscopic study, 571
- triphosphatase activity in phloem of *Nicotiana tabacum*, biochemical and light and EM study, 221
- triphosphatase, transport, localization in rat cornea, light and EM study, 721
- triphosphate, induction of microtubule sliding in bull sperm flagella, EM study, 321
Agglutinins, plant, ferritin-conjugated, use as specific saccharide stains, distribution and asymmetry of mammalian cell surface saccharides, biochemical and EM study, 236
Aggregation, HeLa cells, effects of neuraminidase, calcium, and trypsin, biochemical study, 641
Alkaline phosphatase in HeLa sublines TCRC-1 and TCRC-2, cytological study, 777
α-Amylase release from rat parotid tissue, effect of cytochalasin B and colchicine, biochemical study, 519
Antigen distribution, guinea pig spermatozoa, immunological and EM study, 789
Antigens, auto-, specific for rat liver subcellular membranes, biochemical and immunological study, 460
—, H-2, mouse embryonic tooth epithelial and mesenchymal cell surfaces, EM study, 795
Astrocytes, particle arrays in membranes, mouse, rabbit, or chinchilla brain, freeze-fracture EM study, 316

B

Bacteria *Azotobacter vinelandii*, Mo-Fe protein of nitrogenase, biochemical and EM study, 311
Basal bodies and cilia, isolation from rabbit oviduct, transmission and scanning EM study, 393
Beef, heart and kidney, mitochondria, membrane junctions in intermembrane space, biochemical and EM study, 653
Bladder, urinary, and gallbladder, toad, structure of zonula occludens, single fibril model, freeze-fracture EM study, 168
Blood capillaries, rat muscular and visceral, endothelium of, morphometric EM study, 128
—, human, aggregation of platelets by tumor promoter phorbol ester, biochemical study, 325
—, human, isolation of alpha granules and mitochondria from platelets, biochemical and EM study, 507
Bodies, spheroidal, junctional sarcoplasmic reticulum, lizard myocardial cells, EM study, 602
Brain and liver, rat and mouse, colchicine binding of membrane fractions, biochemical study, 297
—, mouse, rabbit, or chinchilla, particles arrays in astrocytic membranes, freeze-fracture EM study, 316
—, pig, neuronal microtubule surface lattice and subunit structure, computer and EM study, 153
—, rat, hypothalamo-neurohypophyseal neurosecretion, effect of ether anesthesia, autoradiographic light and EM study, 554
Bull, sperm flagella, ATP-induced sliding of microtubules, EM study, 321

C

Calcitonin, parathyroid hormone, and colchicine, effects on ultrastructure and activity of osteoclasts of rat fetal bone, biochemical and EM study, 346
Calcium, in human platelet granules, EM study, 775
—, neuraminidase, and trypsin, effects on aggregation of HeLa cells, biochemical study, 641
Capillary, blood, rat muscular and visceral, endothelium of, morphometric EM study, 128
Cat, sympathetic ganglia, synaptic vesicle depletion and recovery, EM study, 365
Catalase, beef liver, and rat liver peroxisomes, effect of glutaraldehyde, biochemical and cytochemical EM study, 303
Cell cycle, CHO cells, changes in histone phosphorylation associated with cell proliferation and chromosome condensation, biochemical study, 356
— death, visceromotor neurons of chick embryo spinal cord, light and EM study, 448
— growth, human fibroblasts, inhibition in G_1 phase by cyclic AMP, biochemical study, 249
— surface, *Amoeba*, characterization of, biochemical and EM study, 26
— surface, glycoprotein migration from Golgi apparatus to, 50 cell types, after fucose injection, autoradiographic light and EM study, 258

Cells, *Acer pseudoplatanus*, localization of proline, autoradiographic EM study, 695
—, chick fibroblasts, stimulation by insulin of RNA synthesis, biochemical study, 54
—, Chinese hamster CHO line, DNA distributions in flow microfluorometry, autoradiographic and mathematical study, 523
—, Chinese hamster ovary, cell cycle-specific changes in histone phosphorylation associated with cell proliferation and chromosome condensation, biochemical study, 356
—, Chinese hamster ovary, cyclic changes in cell surface, effect of cytochalasin B on surface morphology, scanning EM study, 442
—, Chinese hamster ovary, cyclic changes in cell surface, inhibition by cytochalasin B of thymidine transport, biochemical study, 434
—, contractile interstitial, rat lung, in pulmonary alveolar septa, EM and immunological and physiological study, 375
—, HeLa, effects of neuraminidase, calcium, and trypsin on aggregation, biochemical study, 641
—, HeLa S3 strain, mitochondria, protein synthesis, biochemical study, 755
—, HeLa sublines, Regan isoenzyme in TCRC-1, non-Regan isoenzyme in TCRC-2, cytological study, 777
—, hepatoma H35, HTC, MH_1C_1, and RLC, regulation of phosphoenolpyruvate carboxykinase and tyrosine transaminase, biochemical study, 181
—, HTS and RLC, liver-derived lines, regulation of tyrosine aminotransferase, biochemical and cytological study, 337
—, human fibroblasts, inhibition of cell growth in G_1 phase by cyclic AMP, biochemical study, 249
—, human somatic, ploidy of living clones, mensuration at metaphase, cytological study, 781
—, human vascular endothelial, tissue culture of, DNA synthesis, autoradiographic and cytological and EM study, 673
—, mouse epidermal cancer, microfilaments, light and EM study, 473
—, murine S49 lymphoma, P3 myeloma, L, 3T3, SV3T3, and HeLa, distribution and asymmetry of cell surface saccharides, ferritin-conjugated plant agglutinins as specific saccharide stains, biochemical and EM study, 236
—, myocardial, lizard, spheroidal bodies in junctional sarcoplasmic reticulum, EM study, 602
Chemical components of isolated cell surface of *Amoeba*, biochemical and EM study, 26
Chick, embryo, cell death in spinal cord, light and EM study, 448
Chinchilla, mouse, or rabbit, brain, particle arrays in astrocytic membranes, freeze-fracture EM study, 316
Chloroplast, *Chlamydomonas reinhardtii*, membrane-bound ribosomes, biochemical and EM study, 65
—, *Streptanthus tortuosus*, viruslike particles, photosynthetic-deficient supergrana in tissue culture, biochemical and freeze-fracture EM study, 285
Chromosome condensation and histone phosphorylation, cell cycle-specific changes, CHO cells, biochemical study, 356
—, mouse testis, RNA synthesis during meiotic prophase, autoradiographic light and EM study, 39
— structure and mitosis, parasitic protozoan *Syndinium*, light and EM study, 702
Cilia and basal bodies, isolation from rabbit oviduct, transmission and scanning EM study, 393
Cleavage, newt egg, wave of stiffness along cortex during, cytological study, 1
Clones, HeLa cell sublines, Regan isoenzyme in TCRC-1, non-Regan isoenzyme in TCRC-2, cytological study, 777
—, living, human somatic cells, ploidy determined by mensuration at metaphase, cytological study, 781
Cnidarian *Bunodosoma cavernata*, oocytes, surface specializations and cortical reaction, light and EM study, 78
Colchicine binding of membrane fractions from rat and mouse liver and brain, biochemical study, 297
— and cytochalasin B, effect on α-amylase release from rat parotid tissue, biochemical study, 519
—, parathyroid hormone, and calcitonin, effects on ultrastructure and activity of osteoclasts of rat fetal bone, biochemical and EM study, 346
Collagen, precursor, synthesis, migration and release by rat odontoblasts, autoradiographic histochemical and EM study, 92
Components, ultrastructural, quantitative analysis, guinea pig skeletal muscle, stereological light and EM study, 732
Cornea, rat, localization of transport adenosine triphosphatase, light and EM study, 721
Cortex, newt egg, wave of stiffness along, during cleavage, cytological study, 1
—, oocyte of cnidarian *Bunodosoma cavernata*, surface specializations and reaction after fertilization, light and EM study, 78
Cotyledons, cucumber and sunflower, cytochemical localization of malate synthase in glyoxysomes, light and EM study, 483
Cryoprotectants, glycerol and dimethylsulfoxide, redistribution of intramembranous particles of mouse lymphocytes induced by, freeze-fracture EM study, 192
Cytochalasin B and colchicine, effect on α-amylase release from rat parotid tissue, biochemical study, 519
— B, effect on new membrane formation during cytokinesis of *Xenopus laevis* eggs, electrophysiological and EM study, 529
— B, effect on surface morphology of CHO cells, cyclic changes, scanning EM study, 442
— B inhibition of thymidine transport, CHO cells, cyclic changes in cell surface, biochemical study, 434
Cytokinesis, normal and cytochalasin B-treated eggs of *Xenopus laevis*, new membrane formation, electrophysiological and EM study, 529

Cytoplasm and mitochondria, ribosomes, *Tetrahymena pyriformis*, biochemical and EM study, 628

D

Dendrites, growth cones and filopodia, synapses on, mouse spinal cord, EM study, 664
Deoxyribonucleic acid distribution in flow microfluorometry, CHO cells, autoradiographic and mathematical study, 523
– acid synthesis, human fibroblasts, inhibition in G_1 phase by cyclic AMP, biochemical study, 249
– acid synthesis, human vascular endothelial cells in tissue culture, autoradiographic and cytological and EM study, 673
Diaphragm, slit, glomerular, porous substructure, mouse and rat kidney, EM study, 423
Dithiothreitol inhibition of nuclear reconstruction in sea urchin eggs, light and EM study, 497

E

Eggs, newt, wave of stiffness along cortex during cleavage, cytological study, 1
–, sea urchin *Lytechinus pictus* and *Strongylocentrotus purpuratus*, inhibition of nuclear reconstruction by dithiothreitol, light and EM study, 497
–, *Xenopus laevis*, normal and cytochalasin B-treated, new membrane formation during cytokinesis, electrophysiological and EM study, 529
Electron microscopy, improved preservation of rabbit parotid gland, stereological EM study, 292
Electrophoresis, *Tetrahymena pyriformis* mitochondrial and cytoplasmic ribosomes, correlation with EM, 628
Embryo, chick, cell death in spinal cord, light and EM study, 448
–, mouse, synapses on motor neuron dendritic growth cones in spinal cord, EM study, 664
–, mouse, tooth epithelial and mesenchymal cell surfaces, H-2 histocompatibility alloantigens, EM study, 795
–, rat, bone, effect of parathyroid hormone, colchicine and calcitonin on ultrastructure and activity of osteoclasts, biochemical and EM study, 346
Endothelium, rat muscular and visceral blood capillaries, morphometric EM study, 128
Enzyme, adenosine triphosphatase activity in phloem of *Nicotiana tabacum*, biochemical and light and EM study, 221
–, adenosine triphosphatase, transport, localization in rat cornea, light and EM study, 721
–, malate synthase, cytochemical localization in glyoxysomes of cucumber and sunflower cotyledons, light and EM study, 483
–, nitrogenase, *Azotobacter vinelandii*, Mo-Fe protein, biochemical and EM study, 311
–, tyrosine aminotransferase activity, regulation in two liver-derived permanent cell lines, biochemical and cytological study, 337
Enzymes, 5′-nucleotidase, thiamine pyrophosphatase, acid phosphatase, glucose-6-phosphatase, markers of rat liver Golgi fractions, cytochemical EM study, 8
Enzymes, phosphoenolpyruvate carboxykinase and tyrosine transaminase, regulation of in hepatoma cell cultures, biochemical study, 181
Epidermis, mouse, microfilaments in cancer cells, light and EM study, 473
Ether anesthesia, effect on hypothalamo-neurohypophyseal neurosecretion, rat brain, autoradiographic light and EM study, 554
Exocytosis, synaptic vesicle depletion and recovery in cat sympathetic ganglia, EM study, 365
Extracellular space, rabbit myocardium, structure and role in ionic exchange, biochemical and EM study, 586

F

Fenestrae, endothelium of rat blood capillaries, morphometric EM study, 128
Ferritin-conjugated plant agglutinins as specific saccharide stains, distribution and asymmetry of mammalian cell surface saccharides, biochemical and EM study, 236
Filopodia and growth cones, motor neuron dendritic, synapses on, mouse spinal cord, EM study, 664
Flagella, bull sperm, ATP-induced sliding of microtubules, EM study, 321
Flow microfluorometry, DNA distribution in CHO cells, autoradiographic and mathematical study, 523
Follicle, mouse, oocyte and granulosa cell nuclei, RNA synthesis, autoradiographic and cytological study, 416
Frog *Rana pipiens*, oocytes, nuclear permeability and intracellular transport of inulin, autoradiographic study, 405
Fucose injection into rats, glycoprotein migration from Golgi apparatus to surface of various cell types, autoradiographic light and EM study, 258
Fungus *Thraustotheca clavata*, ultrastructure of mitosis, EM study, 204

G

Gallbladder and urinary bladder, toad, structure of zonula occludens, single fibril model, freeze-fracture EM study, 168
Ganglia, sympathetic, cat, synaptic vesicle depletion and recovery, EM study, 365
Glomerulus, mouse and rat kidney, porous substructure of slit diaphragm, EM study, 423
Glutaraldehyde, effect on beef liver catalase and rat liver peroxisomes, biochemical and cytochemical EM study, 303
Glycoprotein migration from Golgi apparatus to surface of 50 cell types, in rat, autoradiographic light and EM study, 258
Glyoxysomes, cucumber and sunflower cotyledons, cytochemical localization of malate synthase, light and EM study, 483
Golgi apparatus, rat cells, glycoprotein migration from to cell surface, after fucose injection, autoradiographic light and EM study, 258
— fractions, rat liver, cytochemical EM study, 8

Granules, alpha, and mitochondria, isolation from human blood platelets, biochemical and EM study, 507
—, calcium, human platelets, EM study, 775
Growth cones and filopodia, motor neuron dendritic, synapses on, mouse spinal cord, EM study, 664
Guinea pig, skeletal muscle, quantitative analysis of volumes, surface areas, and dimensions of components, stereological light and EM study, 732
— pig, spermatozoa, ultrastructural distribution of antigenic sites, immunological and EM study, 789

H

H-2 histocompatibility alloantigens, tooth epithelial and mesenchymal cell surfaces, mouse embryo, EM study, 795
Hamster, neonatal, pancreas, monolayer cultures, immunological and light and EM study, 685
Heart and kidney, rat and beef, mitochondria, membrane junctions in intermembrane space, biochemical and EM study, 653
—, lizard. spheroidal bodies in junctional sarcoplasmic reticulum, EM study, 602
—, rabbit, structure of myocardial interstitium, role in ionic exchange, biochemical and EM study, 586
Histone phosphorylation, cell cycle-specific changes associated with cell proliferation and chromosome condensation, CHO cells, biochemical study, 356
Hormone, glucocorticoid regulation of tyrosine aminotransferase activity in two liver-derived permanent cell lines, biochemical and cytological study, 337
Human, blood platelets, aggregation by tumor promoter phorbol ester, biochemical study, 325
—, blood platelets, isolation of alpha granules and mitochondria, biochemical and EM study, 507
—, platelets, calcium-containing granules, EM study, 775
—, platelets, effects of thrombin on phytohemagglutinin receptor sites, biochemical and freeze-etch EM study, 541
Hypothalamo-neurohypophyseal neurosecretion, rat brain, effect of ether anesthesia, autoradiographic light and EM study, 554

I

Immunoglobulin autoantibodies specific for rat liver subcellular membranes, biochemical and immunological study, 460
Insect, crane fly *Nephrotoma suturalis*, spermatocytes, microfilaments, light and EM study, 784
Insulin stimulation of RNA synthesis in chick fibroblasts, biochemical study, 54
Interstitium, myocardial, rabbit, structure and role in ionic exchange, biochemical and EM study, 586
Inulin, nuclear permeability and intracellular transport in frog oocyte, autoradiographic study, 405
Ionic exchange, role of myocardial interstitium, rabbit, biochemical and EM study, 586
Isoenzyme, Regan, in HeLa subline TCRC-1, non-Regan in TCRC-2, cytological study, 777

J

Junction, tight, toad urinary bladder and gallbladder, single fibril model, freeze-fracture EM study, 168
Junctional sarcoplasmic reticulum, lizard myocardial cells, spheroidal bodies, EM study, 602
Junctions, membrane, intermembrane space of mitochondria, mammalian heart and kidney, biochemical and EM study, 653

K

Kidney and heart, rat and beef, mitochondria, membrane junctions in intermembrane space, biochemical and EM study, 653
—, mouse and rat, porous substructure of glomerular slit diaphragm, EM study, 423

L

Liver and brain, rat and mouse, colchicine binding of membrane fractions, biochemical study, 297
—, rat, Golgi fractions, cytochemical EM study, 8
—, rat, lysosomes, properties of tritosome surface, biochemical and electrokinetic study, 764
—, rat, membrane-specific autoantigens, biochemical and immunological study, 460
—, rat, microsomes, spatial arrangement of membrane proteins, biochemical study, 616
—, rat, peroxisomes, and beef liver catalase, effect of glutaraldehyde, biochemical and cytochemical EM study, 303
Lizard *Anolis carolinensis*, heart, spheroidal bodies in junctional sarcoplasmic reticulum, EM study, 602
Lung, rabbit, macrophages, effects of serum on adenosine transport, inhibition by showdomycin, biochemical and light microscopic study, 571
—, rat, contractile interstitial cells in pulmonary alveolar septa, EM and immunological and physiological study, 375
Lymphocytes, mouse, cryoprotectant-induced redistribution of intramembranous particles, freeze-fracture EM study, 192
Lysosomes, rat liver, properties of tritosome surface, biochemical and electrokinetic study, 764

M

Macrophages, rabbit lung, effects of serum on adenosine transport, inhibition by showdomycin, biochemical and light microscopic study, 571
Malate synthase, cytochemical localization in glyoxysomes of cucumber and sunflower cotyledons, light and EM study, 483
Meiosis, mouse testis, nucleolar and perichromosomal RNA synthesis during prophase, autoradiographic light and EM study, 39

Membrane, chloroplast of *Chlamydomonas reinhardtii*, binding of ribosomes, biochemical and EM study, 65
– formation during cytokinesis in normal and cytochalasin B-treated eggs of *Xenopus laevis*, electrophysiological and EM study, 529
– fractions, mouse and rat liver and brain, colchicine binding, biochemical study, 297
– junctions, intermembrane space of mitochondria, mammalian heart and kidney, biochemical and EM study, 653
–, oocyte of cnidarian *Bunodosoma cavernata*, surface specialization and cortical reaction, light and EM study, 78
– transport, rabbit lung macrophages, showdomycin inhibition of serum stimulation, biochemical and light microscopic study, 571
Membranes, astrocytes, particle arrays, mouse, rabbit, or chinchilla brain, freeze-fracture EM study, 316
–, rat liver microsomes, spatial arrangement of proteins, biochemical study, 616
–, subcellular, rat liver, specific autoantigens, biochemical and immunological study, 460
Metaphase, human somatic cells, ploidy of living clones, cytological study, 781
Microfilaments, mouse epidermal cancer cells, light and EM study, 473
–, *Nephrotoma suturalis* spermatocytes, light and EM study, 784
Microsomes, rat liver, spatial arrangement of membrane proteins, biochemical study, 616
Microtubules, bull sperm flagella, ATP-induced sliding, EM study, 321
–, neuronal, surface lattice and subunit structure, computer and EM study, 153
Mitochondria, and alpha granules, isolation from human blood platelets, biochemical and EM study, 507
–, and cytoplasm, ribosomes, *Tetrahymena pyriformis*, biochemical and EM study, 628
–, HeLa cells, protein synthesis, biochemical study, 755
–, mammalian heart and kidney, membrane junctions in intermembrane space, biochemical and EM study, 653
Mitosis and chromosome structure, parasitic protozoan *Syndinium*, light and EM study, 702
–, fungus *Thraustotheca clavata*, EM study, 204
Morphometry, endothelium of rat muscular and visceral blood capillaries, EM study, 128
Mouse, embryo, tooth epithelial and mesenchymal cell surfaces, H-2 histocompatibility alloantigens, EM study, 795
–, epidermis, microfilaments in cancer cells, light and EM study, 473
–, liver and brain, colchicine binding of membrane fractions, biochemical study, 297
–, lymphocytes, cryoprotectant-induced redistribution of intramembranous particles, freeze-fracture EM study, 192
–, oocyte and granulosa cell nuclei, RNA synthesis, autoradiographic and cytological study, 416
–, rabbit, or chinchilla, brain, particle arrays in astrocytic membranes, freeze-fracture EM study, 316
Mouse and rat kidney, porous substructure of glomerular slit diaphragm, EM study, 423
–, spinal cord, synapses on motor neuron dendritic growth cones and filopodia, EM study, 664
–, testis, nucleolar and perichromosomal RNA synthesis during meiotic prophase, autoradiographic light and EM study, 39
Muscle, skeletal, guinea pig, quantitative analysis of volumes, surface areas, and dimensions of components, stereological light and EM study, 732

N

Neuraminidase, calcium, and trypsin, effects on aggregation of HeLa cells, biochemical study, 641
Neurohypophyseal-hypothalamic neurosecretion, rat brain, effect of ether anesthesia, autoradiographic light and EM study, 554
Neuronal microtubule surface lattice and subunit structure, computer and EM study, 153
Neurons, visceromotor, chick embryo spinal cord, light and EM study, 448
Neurosecretion, hypothalamo-neurohypophyseal, rat brain, effect of ether anesthesia, autoradiographic light and EM study, 554
Newt *Cynops* (*Triturus*) *pyrrhogaster*, egg, wave of stiffness along cortex during cleavage, cytological study, 1
Nitrogenase, *Azotobacter vinelandii*, Mo-Fe protein, biochemical and EM study, 311
Nucleolus, mouse testis, RNA synthesis during meiotic prophase, autoradiographic light and EM study, 39
–, reorganization, *Allium cepa* root meristem, biochemical and cytological study, 502
Nucleus, frog oocyte, permeability and intracellular transport of inulin, autoradiographic study, 405
–, granulosa cell, mouse ovary, RNA synthesis, autoradiographic and cytological study, 416
–, sea urchin egg, inhibition of reconstruction by dithiothreitol, light and EM study, 497

O

Odontoblasts, rat teeth, synthesis, migration, and release of precursor collagen, autoradiographic histochemical and EM study, 92
Oocytes, cnidarian *Bunodosoma cavernata* surface specializations and cortical reaction, light and EM study, 78
–, frog, nuclear permeability and intracellular transport of inulin, autoradiographic study, 405
–, mouse, RNA synthesis, autoradiographic and cytological study, 416
Osteoclasts, rat fetal bone, effects of parathyroid hormone, colchicine, and calcitonin on ultrastructure and activity, biochemical and EM study, 346
Oviduct, rabbit, isolation of basal bodies and cilia, transmission and scanning EM study, 393

P

Pancreas, hamster, neonatal, monolayer cultures, immunological and light and EM study, 685
Parathyroid hormone, colchicine, and calcitonin, effects on ultrastructure and activity of osteoclasts of rat fetal bone, biochemical and EM study, 346
Parotid glands, rabbit, improved preservation for electron microscopy, stereological EM study, 292
— glands, rat, effect of cytochalasin B and colchicine on α-amylase release, biochemical study, 519
Particles, intramembranous, mouse lymphocytes, cryoprotectant-induced redistribution, freeze-fracture EM study, 192
Peroxisomes, rat liver, and beef liver catalase, effect of glutaraldehyde, biochemical and cytochemical EM study, 303
Phloem, *Nicotiana tabacum*, adenosine triphosphatase activity, biochemical and light and EM study, 221
Phorbol ester (12-0-tetradecanoyl-phorbol-13-acetate), aggregating agent for human blood platelets, biochemical study, 325
Phosphoenolpyruvate carboxykinase and tyrosine transaminase, regulation of in hepatoma cell cultures, biochemical study, 181
Phosphorylation, histone, cell cycle-specific changes associated with cell proliferation and chromosome condensation, CHO cells, biochemical study, 356
Phytohemagglutinin, lentil, receptor sites in human platelets, effects of thrombin, biochemical and freeze-etch EM study, 541
Pig, brain, neuronal microtubule surface lattice and subunit structure, computer and EM study, 153
Plant *Allium cepa*, root meristem, nucleolar reorganization, biochemical and cytological study, 502
— *Nicotiana tabacum*, phloem, adenosine triphosphatase activity, biochemical and light and EM study, 221
— *Streptanthus tortuosus* var. *orbiculatus*, chloroplasts with viruslike particles, photosynthetic-deficient supergrana, biochemical and freeze-fracture EM study, 285
Plants, cucumber and sunflower, cotyledons, glyoxysomes, cytochemical localization of malate synthase, light and EM study, 483
Platelets, human blood, aggregation by tumor promoter phorbol ester, biochemical study, 325
—, human blood, isolation of alpha granules and mitochondria, biochemical and EM study, 507
—, human, calcium-containing granules, EM study, 775
—, human, effects of thrombin on phytohemagglutinin receptor sites, biochemical and freeze-etch EM study, 541
Ploidy of living clones, human somatic cells, mensuration at metaphase, cytological study, 781
Proline distribution in cultured *Acer* cells, autoradiographic EM study, 695
Protein, Mo-Fe, of *Azotobacter vinelandii* nitrogenase, biochemical and EM study, 311
Protein synthesis, HeLa cells, mitochondria, biochemical study, 755
Proteins, spatial arrangement on rat liver microsomal membranes, biochemical study, 616
Protozoan *Amoeba* T_1D_{13}, Q, and S strains, characterization of isolated cell surface, biochemical and EM study, 26
— *Syndinium*, chromosome structure and mitosis, light and EM study, 702
— *Tetrahymena pyriformis*, ribosomes, mitochondria and cytoplasm, biochemical and EM study, 628

R

Rabbit, heart, structure of myocardial interstitium, role in ionic exchange, biochemical and EM study, 586
—, lung macrophages, effects of serum on adenosine transport, inhibition by showdomycin, biochemical and light microscopic study, 571
—, mouse, or chinchilla, brain, particle arrays in astrocytic membranes, freeze-fracture EM study, 316
—, oviduct, isolation of basal bodies and cilia, transmission and scanning EM study, 393
—, parotid gland, improved preservation for electron microscopy, stereological EM study, 292
Radioactive label, [^{14}C]amino acids, [^{14}C]methionine, and [^{3}H]leucine, mitochondrial protein synthesis in HeLa cells, biochemical study, 755
— label, [^{14}C]proline, localization of proline in cultured *Acer* cells, autoradiographic EM study, 695
— label, [^{14}C]serotonin, aggregation of human blood platelets by tumor promoter phorbol ester, biochemical study, 325
— label, [^{14}C]sodium bicarbonate, photosynthetically-deficient supergranal chloroplasts in tissue culture containing viruslike particles, biochemical and freeze-fracture EM study, 285
— label, [^{14}C]sucrose, [^{35}S]sulfate, and [^{140}La]lanthanum, structure of rabbit myocardial interstitium, role in ionic exchange, biochemical and EM study, 586
— label, [^{14}C or ^{3}H]amino acids, [^{14}C or ^{3}H]uridine, [^{3}H] adenosine, [^{3}H]cytidine, [^{3}H]guanosine, [^{3}H]UTP, and [^{32}P]phosphoric acid, stimulation by insulin of RNA synthesis in chick fibroblasts, biochemical study, 54
— label, [^{14}C or ^{3}H]lysine, [^{3}H]thymidine, and [^{32}P]phosphoric acid, histone phosphorylation during cell cycle, CHO cells, biochemical study, 356
— label, [^{45}Ca]calcium, effects of parathyroid hormone, colchicine and calcitonin on ultrastructure and activity of osteoclasts, rat fetal bone, biochemical and EM study, 346
— label, [^{3}H]adenine, membrane-bound ribosomes in *Chlamydomonas reinhardi* chloroplast, biochemical and EM study, 65
— label, [^{3}H]adenosine and [^{3}H]inulin, effects of serum on adenosine transport in rabbit lung macrophages, inhibition by showdomycin, biochemical and light microscopic study, 571

Radioactive label, [^{3}H]colcemid, [^{3}H or ^{14}C]colchicine, colchicine binding of membrane fractions from rat and mouse liver and brain, biochemical study, 297
– label, [^{3}H]cystine, [^{3}H]leucine, and [^{3}H]proline, hypothalamo-neurohypophyseal neurosecretion in rat brain, autoradiographic light and EM study, 554
– label, [^{3}H]dibutyryl cyclic AMP, [^{3}H]deoxyadenosine, and [^{3}H]thymidine, regulation of phosphoenolpyruvate carboxykinase and tyrosine transaminase in hepatoma cell cultures, biochemical study, 181
– label, [^{3}H]fucose, glycoprotein migration from Golgi apparatus to surface of 50 cell types, in rat, autoradiographic light and EM study, 258
– label, [^{3}H]inulin, nuclear permeability and intracellular distribution of inulin in frog oocyte, autoradiographic study, 405
– label, [^{3}H]proline, synthesis, migration, and release of precursor collagen by rat odontoblasts, autoradiographic histochemical and EM study, 92
– label, [^{3}H]$NaBH_4$ and [^{125}I]sodium iodide, spatial arrangement of proteins in rat liver microsomal membranes, biochemical study, 616
– label, [^{3}H]thymidine, cyclic changes in surface of CHO cells, inhibition by cytochalasin B of thymidine transport, biochemical study, 434
– label, [^{3}H]thymidine, flow microfluorometry of DNA distribution in CHO cells, autoradiographic and mathematical study, 523
– label, [^{3}H]thymidine, inhibition of cell growth of human fibroblasts in G_1 phase by cyclic AMP, biochemical study, 249
– label, [^{3}H]thymidine, tissue culture of human vascular endothelial cells, DNA synthesis, autoradiographic and cytological and EM study, 673
– label, [^{3}H]uridine, nucleolar and perichromosomal RNA synthesis during meiotic prophase in mouse testis, autoradiographic light and EM study, 39
– label, [^{3}H]uridine, RNA synthesis in mouse oocyte and granulosa cell nuclei, autoradiographic and cytological study, 416
– label, [^{125}I]sodium iodide, effects of thrombin on phytohemagglutinin receptor sites in human platelets, biochemical and freeze-etch EM study, 541
Rat, brain, hypothalamo-neurohypophyseal neurosecretion, effect of ether anesthesia, autoradiographic light and EM study, 554
–, 50 cell types, migration of glycoprotein from Golgi apparatus to cell surface, after fucose injection, autoradiographic light and EM study, 258
–, cornea, localization of transport adenosine triphosphatase, light and EM study, 721
–, embryo, bone, effects of parathyroid hormone, colchicine and calcitonin on ultrastructure and activity of osteoclasts, biochemical and EM study, 346
–, endothelium of muscular and visceral blood capillaries, morphometric EM study, 128
Rat, heart and kidney, mitochondria, membrane junctions in intermembrane space, biochemical and EM study, 653
–, liver and brain, colchicine binding of membrane fractions, biochemical study, 297
–, liver, Golgi fractions, cytochemical EM study, 8
–, liver, lysosomes, properties of tritosome surface, biochemical and electrokinetic study, 764
–, liver, membrane-specific autoantigens, biochemical and immunological study, 460
–, liver, microsomes, spatial arrangement of membrane proteins, biochemical study, 616
–, liver, peroxisomes, and beef liver catalase, effect of glutaraldehyde, biochemical and cytochemical EM study, 303
–, lungs, contractile interstitial cells in pulmonary alveolar septa, EM and immunological and physiological study, 375
– and mouse, kidney, porous substructure of glomerular slit diaphragm, EM study, 423
–, parotid gland tissue, effect of cytochalasin B and colchicine on α-amylase release, biochemical study, 519
–, teeth, synthesis, migration, and release of precursor collagen by odontoblasts, autoradiographic histochemical and EM study, 92
Regan isoenzyme in HeLa subline TCRC-1, non-Regan isoenzyme in TCRC-2, cytological study, 777
Ribonucleic acid synthesis, mouse oocyte and granulosa cell nuclei, autoradiographic and cytological study, 416
– acid synthesis, nucleolar and perichromosomal, during meiotic prophase in mouse testis, autoradiographic light and EM study, 39
– acid synthesis, stimulation by insulin, in chick fibroblasts, biochemical study, 54
Ribosomes, binding to chloroplast membranes in *Chlamydomonas reinhardtii*, biochemical and EM study, 65
–, *Tetrahymena pyriformis*, mitochondria and cytoplasm, biochemical and EM study, 628
Root, *Allium cepa*, meristem, nucleolar reorganization, biochemical and cytological study, 502

S

Saccharides, distribution and asymmetry on mammalian cell surface, use of ferritin-conjugated plant agglutinins as specific stains, biochemical and EM study, 236
Sarcoplasmic reticulum, junctional, lizard myocardial cells, spheroidal bodies, EM study, 602
Sea urchin *Lytechinus pictus* and *Strongylocentrotus purpuratus*, eggs, inhibition of nuclear reconstruction by dithiothreitol, light and EM study, 497
Septa, alveolar, rat lung, contractile interstitial cells, EM and immunological and physiological study, 375
Showdomycin inhibition of serum stimulation of adenosine transport, rabbit lung macrophages, biochemical and light microscopic study, 571
Slit diaphragm, glomerular, porous substructure, mouse and rat kidney, EM study, 423

Sperm, bull, ATP-induced sliding of microtubules in flagella, EM study, 321
Spermatocytes, *Nephrotoma suturalis*, microfilaments, light and EM study, 784
Spermatozoa, guinea pig, ultrastructural distribution of antigenic sites, immunological and EM study, 789
Spinal cord, chick embryo, death of visceromotor neurons, light and EM study, 448
— cord, mouse, synapses on motor neuron dendritic growth cones and filopodia, EM study, 664
Stiffness wave along cortex of newt egg during cleavage, cytological study, 1
Supergrana, photosynthetic-deficient chloroplasts containing viruslike particles, biochemical and freeze-fracture EM study, 285
Surface, *Amoeba*, characterization of, biochemical and EM study, 26
—, cell, glycoprotein migration from Golgi apparatus to, 50 rat cell types, after fucose injection, autoradiographic light and EM study, 258
—, CHO cells, cyclic changes, effect of cytochalasin B on morphology, scanning EM study, 442
—, CHO cells, cyclic changes, inhibition by cytochalasin B of thymidine transport, biochemical study, 434
— lattice, neuronal microtubule, and subunit structure, computer and EM study, 153
—, mammalian cells, distribution and asymmetry of saccharides, use of ferritin-conjugated plant agglutinins as specific saccharide stains, biochemical and EM study, 236
Synapses, motor neuron dendritic growth cones and filopodia, mouse spinal cord, EM study, 664

T

Teeth, rat, synthesis, migration, and release of precursor collagen by odontoblasts, autoradiographic histochemical and EM study, 92
Testis, mouse, nucleolar and perichromosomal RNA synthesis during meiotic prophase, autoradiographic light and EM study, 39
Thrombin, effects on phytohemagglutinin receptor sites in human platelets, biochemical and freeze-etch EM study, 541
Thymidine transport, CHO cells, inhibition by cytochalasin B, cyclic changes in cell surface, biochemical study, 434
Tissue culture, *Acer pseudoplatanus*, localization of proline, autoradiographic EM study, 695
— culture, hepatoma H35, HTC, MH_1C_1 and RLC cells, regulation of phosphoenolpyruvate carboxykinase and tyrosine transaminase, biochemical study, 181
— culture, human vascular endothelial cells, DNA synthesis, autoradiographic and cytological and EM study, 673
— culture, neonatal hamster pancreas, immunological and light and EM study, 685
— culture, stimulation by insulin of RNA synthesis in chick fibroblasts, biochemical study, 54
Tissue culture, *Streptanthus tortuosus* var. *orbiculatus* chloroplasts containing viruslike particles, photosynthetically-deficient supergrana, biochemical and freeze-fraction EM study, 285
Toad *Bufo marinus*, urinary bladder and gallbladder, structure of zonula occludens, single fibril model, freeze-fracture EM study, 168
— *Xenopus laevis*, eggs, normal and cytochalasin B-treated, new membrane formation during cytokinesis, electrophysiological and EM study, 529
Tooth epithelial and mesenchymal cell surface, H-2 histocompatibility alloantigens, mouse embryo, EM study, 795
Tritosome surface properties, rat liver lysosome, biochemical and electrokinetic study, 764
Trypsin, calcium, and neuraminidase, effects on aggregation of HeLa cells, biochemical study, 641
Tubulin subunit, neuronal microtubule, computer and EM study, 153
Tumor promoter phorbol ester (12-0-tetradecanoylphorbol-13-acetate), aggregating agent for human blood platelets, biochemical study, 325
Tyrosine aminotransferase activity, regulation in two liver-derived permanent cell lines, biochemical and cytological study, 337
— transaminase and phosphoenolpyruvate carboxykinase, regulation of in hepatoma cell cultures, biochemical study, 181

U

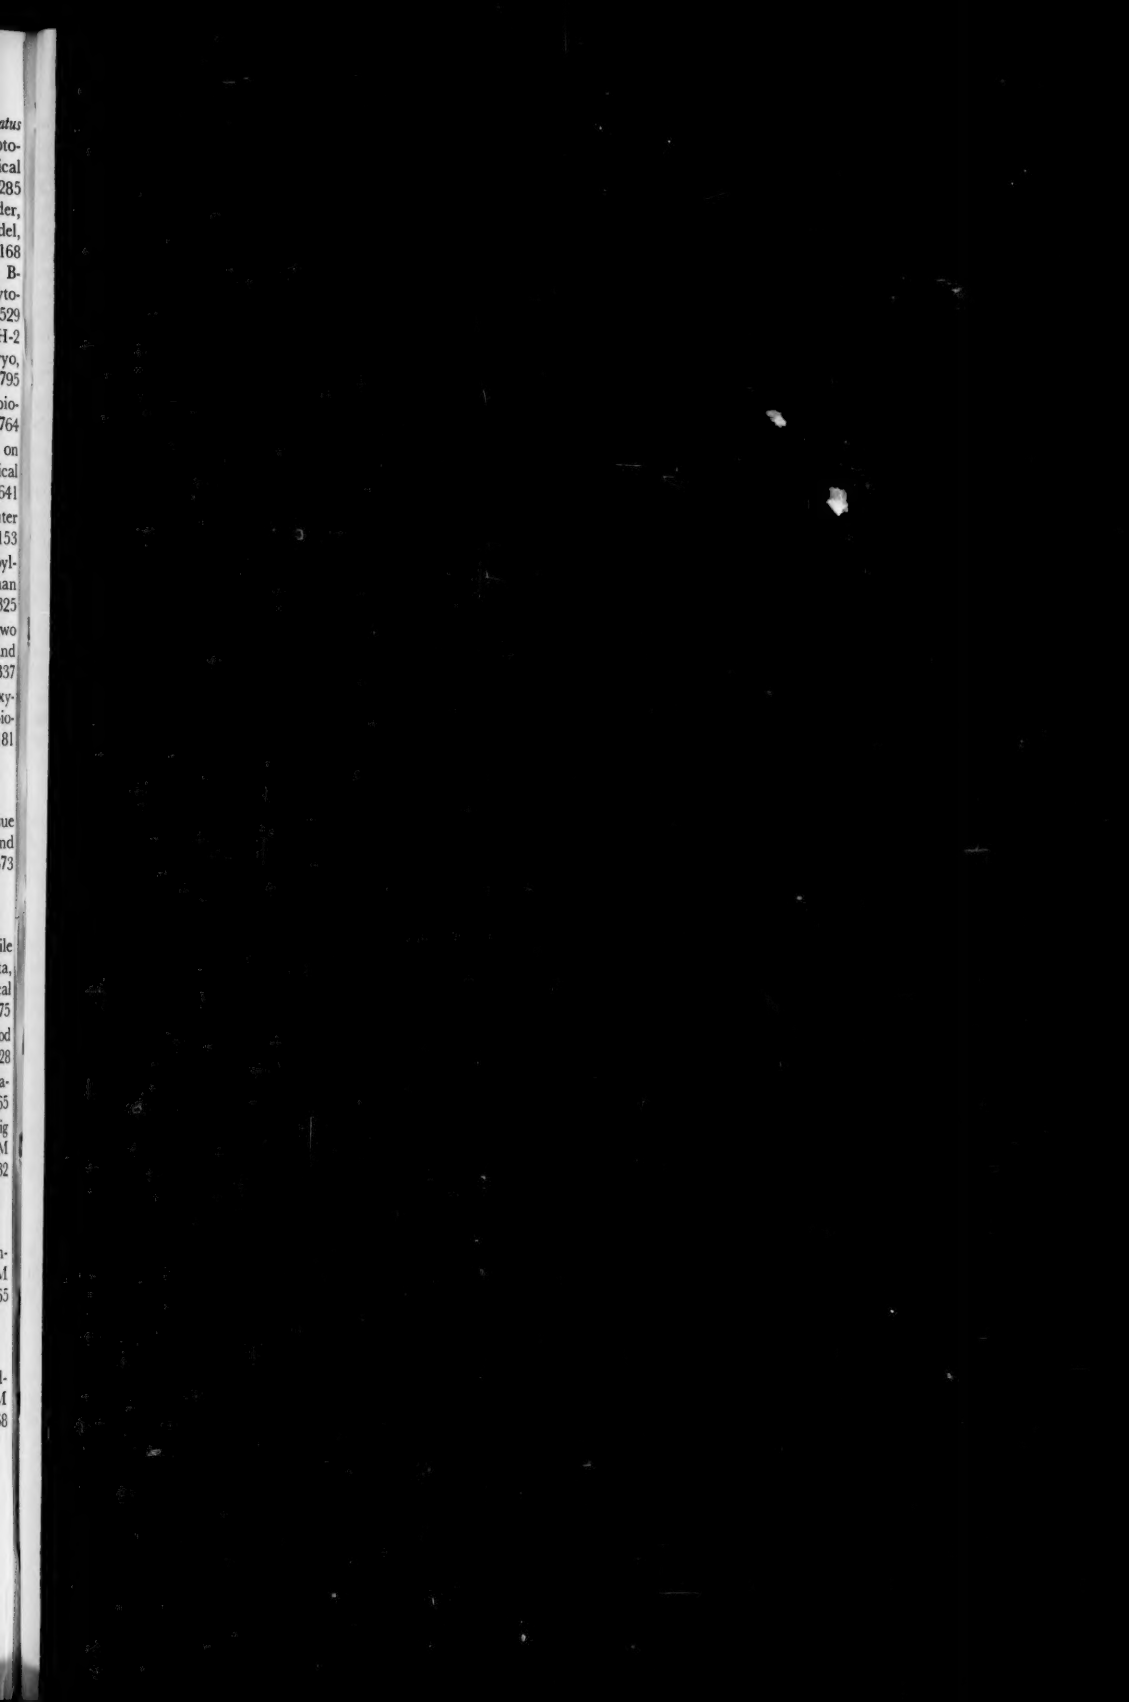
Umbilical cord vein endothelial cells, human, tissue culture of, DNA synthesis, autoradiographic and cytological and EM study, 673

V

Ventilation:perfusion ratio, regulation by contractile interstitial cells in rat pulmonary alveolar septa, EM and immunological and physiological study, 375
Vesicles, plasmalemmal, endothelium of rat blood capillaries, morphometric EM study, 128
—, synaptic, depletion and recovery in cat sympathetic ganglia, EM study, 365
Volumes, ultrastructural components of guinea pig skeletal muscle, stereological light and EM study, 732

Y

Yeast *Chlamydomonas reinhardtii*, chloroplast, membrane-bound ribosomes, biochemical and EM study, 65

Z


Zonula occludens, toad urinary bladder and gallbladder, single fibril model, freeze-fracture EM study, 168
